Module 06 - Polynomial Equations

 $Objectives\ list\ for\ Module\ 6\ -\ Polynomial\ Equations.$

In this homework, we will explore polynomial functions: what they look like and how to construct them. The objectives for this homework are:

- (a) Identify the end behavior and zero behavior of a polynomial function.
- (b) Convert between a polynomial function and its graph.
- (c) Construct a lowest-degree polynomial given its zeros.
